Participants to attend the conference are:
{full name and role in the company}

We are seeking to book accommodation for

.....
the night of the 17th to 18th May 2016 – number of people

.....
the night of the 18th to 19th May 2016 – number of people

alucast

... with us ever higher and more safely

The conference motto:

“Everything is possible; one just needs to want and to know how”
[the motto of Tomas Bata, one of the greatest entrepreneurs
of our region]

The aim of the conference:

When, in 2000, the founders of the ALUCAST Company decided to found a new company, they wanted just one thing - to produce precision aluminium castings for sophisticated industrial fields, which up-till then nobody in the Czech Republic and its eastern neighbourhood had manufactured. This project succeeded! Today more than 30% of the ALUCAST Company's production is designated for AIRBUS and BOEING and also for other aircraft companies.

The aim of the conference is to acquaint the participants with the manner of the production of precision aluminium castings by the ALUCAST s.r.o. Company and to present the production of lightweight, high-strength, complex parts to the designers and the users that already today successfully meet your requirements of tomorrow. The conference is directed towards engineers, designers and specifically to customers for castings, i.e. for the technicians and the executives of companies that are active in the spheres of aviation, optics and the defence industries. At the conference we will present our production range, we will acquaint you with our quality control methods and such new technologies as the HIPing of castings, heat treatment in accordance with the NADCAP and also with the planned construction of a new ALUCASTair production hall.

Jarmil Cileček

Official languages

The conference languages are Czech and English. There will be simultaneous interpretation of all the contributions presented in Czech and English

Dear Business Partners

**Please allow me to cordially invite you
to the 8th Conference of**

alucast

... with us ever higher and more safely

PROGRAM

17th May 2016

- 6.00 p.m.** Registration of guests from abroad at BUCHLOVICE Hotel
- 6.30 p.m.** Welcome for the guests from abroad
Jarmil Cileček – Company Executive
- 8.00 p.m.** An evening tour of Buchlovice Chateau
- 9.00 p.m.** An evening event with wine and Moravian music

18th May 2016

- 08.00 a.m.** Registration of the participants at BUCHLOVICE Hotel
- 08.15 a.m.** The opening of the Conference
Jarmil Cileček – Company Executive
Introducing the conference participants, the purpose of the conference and the conference programme
- 08.30 a.m.** We have already been producing castings for you for 15 years
Jarmil Cileček – Company Executive
ALUCAST in the year 2000 – today – in 2020
- 08.45 a.m.** A worldwide overview of the production of precision castings
The latest trends in the precision casting technology
Prof. Milan Horáček – TU Brno
The current status worldwide concerning the production of castings using the investment casting technology and the latest trends in regard to the use of this technology and to the raw materials, the equipment and the foundry alloys that are used today.
- 09.15 a.m.** The production of highly sophisticated precision aluminium castings by the ALUCAST Company
Jarmil Cileček – Company Executive
The unique position of the ALUCAST Company in the market, the advanced technology used in its production process, its detailed dialogue and its co-operation with its customers, its goals and the company's other purposes which are primarily directed towards the aerospace, the optics and the defence industries.
- 09.45 a.m.** ANNA - a newly developed technology for the production of high-strength aluminium castings
Dr. Martin Juliš – CEITEC Brno
As a part of the European project, in cooperation with the Technical University Brno and the CEITEC Company,

a new technology for the production of high-strength precision aluminium castings has been developed. These castings are used primarily in the aerospace, defence and optics industries.

- 10.15 a.m.** Coffee Break
- 10.45 a.m.** Introducing our co-operators in the areas of machining, surface treatment and assembly
The ALUCAST Company does not only supply castings. We also provide machining, surface treatment and assembly for our customers.
- 11.15 a.m.** Control methods for the castings that are utilised in AIRBUS and BOEING aircraft
Lenka Perutková – Quality Control Director
The ALUCAST Company currently has access to the most modern equipment for checking the homogeneity, the dimensions, the precision and the surface quality of its castings. Its certification under both ISO 9100 and NADCAP for heat processing guarantees that the castings it produces are of the highest quality.
- 11.30 a.m.** The organisation of the work and the monitoring of the processes at the ALUCAST Company
Ladislav Tesař – Managing Director
Vít Mikulka - Production Manager
The planning and the management of the ALUCAST Company's production and the introduction of a newly implemented Factorify Information System.
- 11.45 a.m.** Discussion
- 12.15** Lunch
- 1.15 p.m.** Transfer to the ALUCAST Company
- 1.45 p.m.** A tour of the ALUCAST Company
A tour of the ALUCAST Company, including a presentation of specific production processes, testing methods and quality control, of the heat treatment process using IT technology, the organisational structure of the Company and the traceability of the processes implemented at the ALUCAST s.r.o. Company.
- 3.30 p.m.** Discussion
- 4.15 p.m.** An organ concert in the Basilica at Velehrad
A memorable place of pilgrimage, which Pope John Paul II visited in 1990.
- 4.45 p.m.** The closure of the conference
