

KBC London Branch and **CzechInvest** would like to invite you to a special breakfast briefing on Monday 13th June in London

DOING BUSINESS IN THE CZECH REPUBLIC

An insight into the business environment, trends, opportunities and pitfalls: practical advice for businesses considering investing or expanding in Central and Eastern Europe.

The Czech Republic survived the financial crisis better than most European countries, emerging with only a small dip in economic performance and a robust banking system. The country's GDP is forecasted to grow steadily despite the sluggishness of the Euro zone. What makes the Czech economy resilient and why does it continue to attract significant foreign direct investment? How does it compare with other economies in the region and what can investors expect to gain by setting up operations in the Czech Republic?

To provide the answers, the breakfast briefing will look at the business environment in the Czech Republic including competitiveness, taxation, labour market and regulations, key sectors, skills and investment incentives.

Date:

Monday, 13 June 2011

Location:

KBC London, 111 Old Broad Street, London, EC2N 1BR
