

16. Transport Infrastructure

The Czech Republic possesses one of the most advanced transport networks in Central and Eastern Europe. Its geographical position at the very centre of Europe makes it a natural crossroads for major transit corridors. An extensive network of transport routes serves not only the Czech Republic but also links the country to neighbouring and other European states, and the density of the transport network ranks the Czech Republic among the world's most advanced countries. The significance of the Czech Republic as a transit hub has grown since the Czech Republic became a member of the EU Single Market currently covering the area of 28 countries in Europe with more than 500 million customers in total.

Basic Data on the Transport Infrastructure Network in the Czech Republic

	2009	2010	2011	2012	2013	2014	2015
Length of constructed railway tracks (km)							
Total	15,677	15,666	15,656	15,636	15,607	15,578	15,570
Electric	6,703	6,815	6,895	6,903	6,926	6,915	6,939
Road transport infrastructure							
Total road and motorway network	55,719	55,752	55,742	55,717	55,761	55,748	55,738
European road network, type E	2,603	2,636	2,634	2,634	2,632	2,627	2,628
Motorways/expressways in operation	1,099	1,156	1,172	1,193	1,234	1,235	1,236
Navigable waterways regularly used for transport (km)							
Total length	676	676	676	676	687	687	720
Air transport infrastructure							
Total number of airports, of which:	88	91	91	91	91	91	91
Public International	7	7	6	6	6	6	6
Public Domestic	57	57	58	59	59	58	59
Private International	7	6	5	5	5	3	3
Private Domestic	11	12	15	14	14	14	13
