### Winning start-ups

**Brno, 18 June 2015, South Moravian Innovation Centre**

#### 1. **MonkeyData s.r.o.**

MonkeyData is an analytical tool for e-shops that automatically downloads and analyses data from all sources used by e-shops in the course of conducting business. The most important figures are then displayed in one place on a clearly arranged dashboard. MonkeyData brings continuous control over online business and the data necessary for its further development.

#### 2. **Unisavers s.r.o.**

Thanks to its “Modrá úsporám” (“Blue Savings”) programme, this company daily raises awareness in the area of water consumption and designs and implements water-saving solutions and methods of protecting buildings against flooding and water leaks that owners are unaware of but have to pay for. The main point of the Modrá úsporám programme is an affordable and effective solution for real reduction of water consumption and the energy needed for producing hot water. A result of this is significant reduction of living costs as well as operating costs of firms and organisations.

#### 3. **CleverMaps a.s.**

This company, which develops unique software that visualises business and substantially simplifies paperwork, focuses on projects in the transportation, property administration and business intelligence segments. It helps customers to make qualified decisions, reduce costs and increase productivity. CleverMaps invests more in employee development than do many multinational corporations. After two years, the company has grown by 100% and currently employs 25 people. Thanks to exceptional experience gained in the area of software development, geodetics and property registers, the company is a leader in its field.

#### 1. **SPINDO s.r.o.**

This is an information portal that exclusively supports small, local Czech firms, always in a particular region. The company helps firms to efficiently, measurably and inexpensively promote themselves and to stand up to competition and media pressure from large companies. The project's reach extends to both the micro- and macroeconomic levels. It helps to keep financing in the Czech Republic by encouraging consumers to buy goods and services from local businesses instead of from foreign chains.

## 2. **99 Factory s.r.o.**

The company 99 Factory s.r.o. manufactures custom skateboards using the highest quality materials and modern production technologies, while placing emphasis on ecology. At present, the firm is enjoying rising demand for smaller orders, particularly for longboards. The firm is newly focusing on end-customers, offering the broadest portfolio of longboards in Europe. The customer selects a longboard and then chooses the colour scheme, type and motif of the design, laser or digital printing and spacing of the holes for the trucks.

## 3. **TELMED HTP s.r.o.**

CAREOS is a revolutionary monitoring system for assistive technology that incorporates home-based telemedicine, internet aspects, mobile-telephone applications and EZS sensors into a plug-and-play solution. Acquired data is processed by SwiftShield software using elements of artificial intelligence and neural networks for prediction of crisis situations in the life of the system's user, most frequently a senior citizen or disabled person. This allows users to remain living in their own homes for as long as possible.
